SUMMARY

Full Stack Developer with over 6 years of experience. I have a proven track record of delivering satisfying work for my clients. I've worked on real-time auctioning software, a platform for musicians to build portfolios and track engagement helping them increase their hiring opportunities, and a metadata catalog for movie studios to maintain a single source of truth.

I'm an effective communicator and a team player with a strong capacity to work independently.

I always try to see the projects I'm working on from the user's perspective, ensuring their interaction with the interface is smooth and user-friendly.

In my free time, I work on personal projects that reflect my passion for technology and innovation. These include a Procreate Thumbnail Handler for Windows and a text color plugin for Statamic's WYSIWYG editor.

Many of my projects are open-source, allowing me to give back to the developer community that has supported my growth. My personal website, built with Next.js, showcases my hands-on experience with the latest technologies: <https://nextos.dev>

EXPERIENCE

Full Stack Developer

Fabric

07/2023 - Present Los Angeles, California, United States

Company Description

- Delivered critical fixes for key clients like MGM, Fox, Viacom, etc enhancing their experience and trust in the product
